2 Description of the course

I start with a revision of endogeneity and instrumental variables. I then discuss some growth papers from the 1990s. Lastly I cover recent papers on the long-run roots of economic development, that is, the roles of geography, the Neolithic transition, institutions, ancestry, Europeans, persistence of technological advantages and genetic distance, on development.

3 Assessment

Assessment is by a referee report (35% of the mark) and by an exam (65% of the mark). The final exam takes place TBC (at some point between November 6th and November 23rd).
